---

Good afternoon all-

We need to complete a final review of the attached RA's Transition Book. Below are Superfund sections and a description of the changes I've already made. Please advise if there are more changes NLT Tuesday, October 17. I'm going to consider no answer to mean that you have no further edits.

Also, this focus is on content. I'll address spacing, etc., once the content is correct. Thanks.

1. Superfund Leadership wire diagram (pg 16)- Craig Carroll has been added. Chris Ruhl is still there, but I am unsure who has replaced him.
2. Brownfields (pg 30) No changes.
3. Uranium Waste (pg 45) I replaced the former content with the recent update for the other RA book.
4. Donna Canal (pg 48) Updates made based on edits from John and Carlos.
5. San Jacinto (pg. 50) I replaced the former content with the updated description from the other RA book.
